

# EYEPOPPERS™ GRAPHICS & MEDIA SYSTEMS FOR MUSEUMS AND THE ARTS.

*Sculpture, dimensional art, photography, architecture. Each of these aesthetic media is understood through the visual sensory system and the elements of light, form and color. But only with stereoptic perception do they attain the experiential qualities of space and dimension and become real.*

**HIGH-IMPACT 3D POSTCARDS, 3D POSTERS, 3D BILLBOARDS, AND OTHER UNIQUE EYEPOPPERS™ GRAPHIC FORMATS PROVIDE THE MUSEUM WITH A NEW MEDIUM TO PRESENT FINE ART AS WELL AS TO SUPPORT THE MUSEUM VISITOR WITH THE UNIQUE EXPERIENCE OF BEING THERE.**

*Stereoptic perception is really quite simple and requires no special optics with the ++ method. Just focus for a moment on your finger, then using the ++ crosses let your gaze float up to the “third” image that forms behind your hand, in the middle, and suddenly you’ve got the extraordinary experience of being there.*
