

# BEING THERE. THE THE 4TH DIMENSION OF EXPERIENCE AND THE EYEPOPPERS™ COLLECTION.

*Cross your eyes and merge the two ++ to explore  
the stereoptic experience of being in Los Angeles in 1875.*

+

+

*The Eyepoppers Collection of stereoptic images contains thousands of both contemporary images as well historic images from the 19th century and the earliest years of photography.*

*But the Collection continues to grow with unique new images captured for each new Eyepoppers project.*

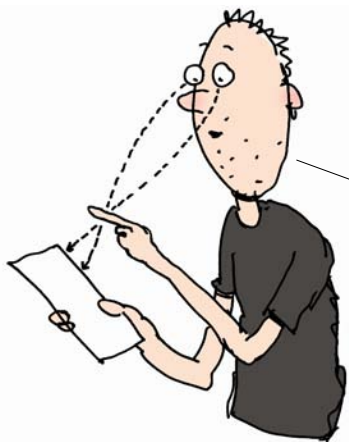

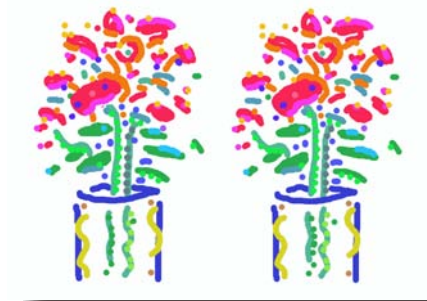

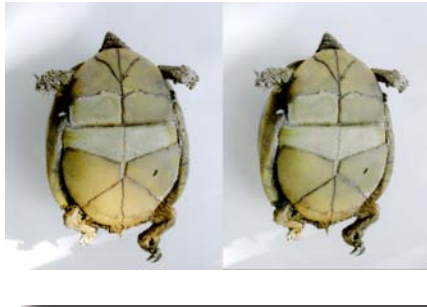

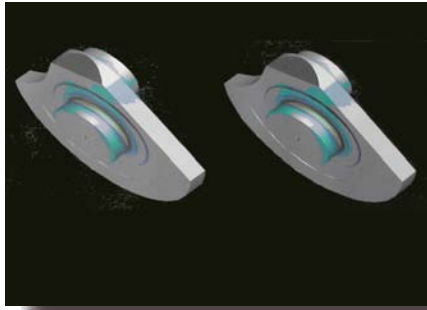

*Most of what we understand about the world we live in is captured through the human visual sensory system and the elements of light, form and color. But only with stereoptic perception do the objects we perceive attain the experiential qualities of space and dimension, and become real.*

*Every kind of subject that holds human meaning is represented in the Collection from personalities and politicians to cityscapes and wilderness, from science to art, on every continent.*

*But in every case, you are with that subject, in that moment. With Eyepoppers you are never just observing an image.*

*You are there.*

*Simply cross your eyes and merge the two ++ to explore the stereoptic experience of being there!*

*Contact Eyepoppers at (562) 433-4352 or write to [beingthere@eyepoppers.us](mailto:beingthere@eyepoppers.us)*

**THE POWER OF BEING THERE.  
THE EXCITEMENT OF THE 4TH DIMENSION  
STARTS WITH EYEPOPPERS™!**
